

Intelligent Virtual Care

Bringing **REAL-TIME ANALYTICS** To Virtual Care

Background

MDLIVE has entered a partnership with Inovalon to support quality and financial performance across the healthcare ecosystem. Inovalon's modular, data-driven platform fully integrates with MDLIVE's virtual office and provides patient-specific analytic insights into quality, behavioral health, risk score accuracy, and continuity of care.

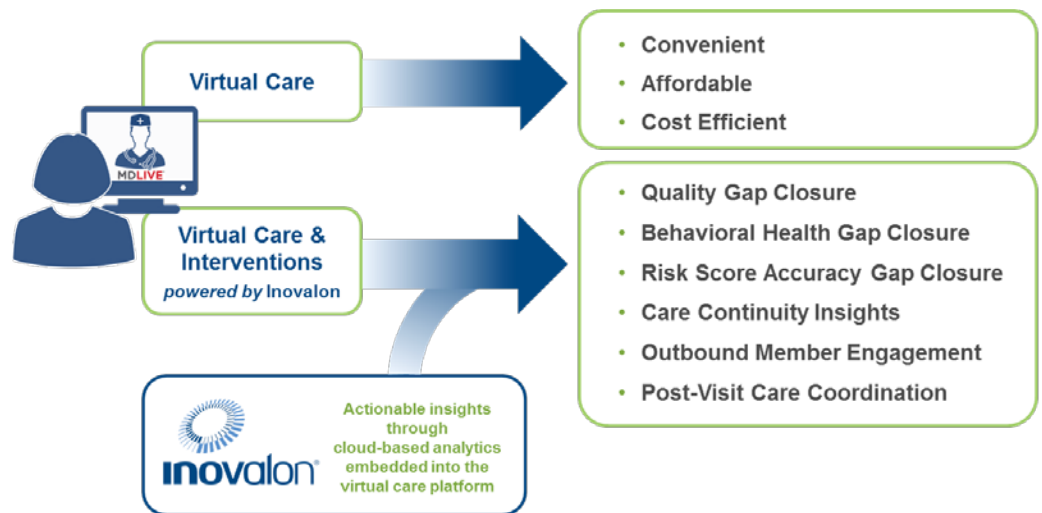

Turn Reactive Routine Virtual Patient Consultation Into a Proactive, Intelligent Virtual Consultation

Together we empower:

- ✓ Real-time, data-driven virtual consultation
- ✓ Proactive patient engagement
- ✓ Timely and targeted multi-channel follow-up interventions
- ✓ Closes gaps in care
- ✓ Improves quality of care
- ✓ Reimbursement incentives are earned

Solution Overview

Our data-driven end-to-end solution positively impacts care quality, cost and risk score accuracy.

Intelligent Virtual Care

Delivering High-Value Impact

Quality
Performance

Empower

- Patient-specific quality measurements
- Behavioral healthcare and gap closure

Medical
History

Provide

- Patient medical history
- Care continuity
- Prescribing patterns
- Utilization costs

Risk Score
Accuracy

Enable

- Patient-specific risk score status and gaps
- Documentation and risk score accuracy

How It Works

MDLIVE's virtual office telehealth platform seamlessly integrates Inovalon's point-of-care clinical summaries in real time with actionable insights that drive higher value.

1. Schedule

MDLIVE patient engagement outreach schedules virtual visit with patient, or patient schedules virtual visit through MDLIVE platform

2. Analyze

MDLIVE Platform integrates patient point-of-care clinical insight summary through Inovalon real-time analytics engine

3. Consult

MDLIVE physician performs virtual care visit using data-driven patient insights through Inovalon dataset

4. Follow-up

MDLIVE physician coordinates follow-up patient intervention to close additional care quality and risk score accuracy gaps
